Hosting History

| Netblock owner | IP address | OS | Web server | Last seen |
|--|----------------|-------|------------|-------------|
| Locaweb Servios de Internet S/A So Paulo | 187.45.193.205 | Linux | Apache | 13-Jul-2019 |

Sender Policy Framework

A host's Sender Policy Framework (SPF) describes who can send mail on its behalf. This is done by publishing an SPF record containing a series of [rules](#). Each rule consists of a qualifier followed by a specification of which domains to apply this qualifier to. For more information please see [openspf.org](#).

| Qualifier | Mechanism | Argument |
|-------------|-----------|-------------------------------------|
| + (Pass) | include | _spf.locaweb.com.br |
| ? (Neutral) | all | |

Modifiers extend the functionality of SPF records. The most common one is the redirect which indicates another host contains the SPF record being searched for.

| Modifier | Argument |
|----------|----------|
|----------|----------|

DMARC

DMARC (Domain-based Message Authentication, Reporting and Conformance) is a mechanism for domain owners to indicate how mail purporting to originate from their domain should be authenticated. It builds on SPF and DKIM, providing a method to set policy and to give reporting of failures. For more information please see dmarc.org.

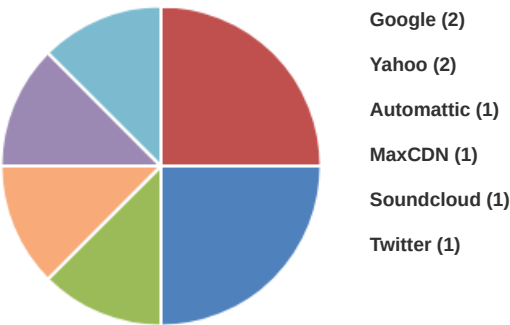

This host does not have a DMARC record.

Web Trackers

Web Trackers are third-party resources loaded onto a webpage. Trackable resources include social sharing widgets, javascript files, and images. These trackers can be used to monitor individual user behaviour across the web. Data derived from these trackers are primarily used for advertising or analytics purposes.

8 known trackers were identified.

Site Technology

Fetchd on 13th July 2019

Server-Side

Includes all the main technologies that Netcraft detects as running on the server such as PHP.

| Technology | Description | Popular sites using this technology |
|--|---|--|
| PHP  | PHP is supported and/or running | www.mediafire.com , www.leparisien.fr , login.etrigue.com |
| XML | <i>No description</i> | tag.sp.advertising.com , assets.bounceexchange.com , cdn.bannerflow.com |
| SSL  | A cryptographic protocol providing communication security over the Internet | kayakoreport.hostasaurus.com |
| PHP Enabled  | Server supports PHP | www.bom.gov.au , www.dasgelbeforum.net , www.espncriinfo.com |

Client-Side

Includes all the main technologies that run on the browser (such as JavaScript and Adobe Flash).

| Technology | Description | Popular sites using this technology |
|---|--|--|
| JavaScript  | Widely-supported programming language commonly used to power client-side dynamic content on websites | www.bitmex.com , docs.microsoft.com , vdms-ssl.cedexis-test.com |

Client-Side Scripting Frameworks

Frameworks or libraries allow for easier development of applications by providing an Application Program Interface (API) or a methodology to follow whilst developing.

| Technology | Description | Popular sites using this technology |
|--|---|--|
| jQuery  | A JavaScript library used to simplify the client-side scripting of HTML | secure-assets.rubiconproject.com , yandex.ru , social.technet.microsoft.com |
| Google Hosted Libraries  | Google API to retrieve JavaScript libraries | www.google.com , www.researchgate.net , www.walmart.com |
| Font Awesome Web Fonts  | <i>No description</i> | www.zerohedge.com , www.balasai.com , www.nicehash.com |

Blog

Blog software is software designed to simplify creating and maintaining weblogs. They are specialized content management systems that support the authoring, editing, and publishing of blog posts and comments.

| Technology | Description | Popular sites using this technology |
|--|--|--|
| WordPress Self-Hosted  | Free and open source blogging tool and a content management system (CMS) based on PHP and MySQL (hosted independently) | www.ccn.com , imagesrv.adition.com , sellercentral.amazon.de |

PHP Application

PHP is an open source server-side scripting language designed for Web development to produce dynamic Web pages.

| Technology | Description | Popular sites using this technology |
|------------|-------------|-------------------------------------|
|------------|-------------|-------------------------------------|

| Technology | Description | Popular sites using this technology |
|--|---|--|
| WordPress  | Free and open source blogging tool and a content management system (CMS) based on PHP and MySQL | wordpress.com , blogs.technet.microsoft.com |

RSS Feed

RSS Rich Site Summary is a family of web feed formats used to publish frequently updated works such as blog entries, news headlines, audio, and video in a standardized format.

| Technology | Description | Popular sites using this technology |
|--|---|---|
| RSS  | Standardized web feed format used to publish frequently updated works | www.makeuseof.com , www.sdna.gr , www.wilderssecurity.com |

Character Encoding

A character encoding system consists of a code that pairs each character from a given repertoire with something else such as a bit pattern, sequence of natural numbers, octets, or electrical pulses in order to facilitate the transmission of data (generally numbers or text) through telecommunication networks or for data storage.

| Technology | Description | Popular sites using this technology |
|---|---------------------------------|---|
| UTF8  | UCS Transformation Format 8 bit | gmail.com |

Doctype

A Document Type Declaration, or DOCTYPE, is an instruction that associates a particular SGML or XML document (for example, a webpage) with a Document Type Definition (DTD).

| Technology | Description | Popular sites using this technology |
|--|---|---|
| HTML5  | Latest revision of the HTML standard, the main markup language on the web | outlook.live.com , dtm.advertising.com , accounts.google.com |
| HTML  | The main markup language used for displaying web pages within browsers | paragon-na.amazon.com , s.click.aliexpress.com , console.aws.amazon.com |

HTML 5

HTML5 is a markup language for structuring and presenting content for the World Wide Web and a core technology of the Internet. It is the fifth revision of the HTML standard.

| Technology | Description | Popular sites using this technology |
|--------------------------|--|---|
| Viewport meta tag | HTML5 tag usually used for mobile optimization | www.coinbase.com , discordapp.com , login.salesforce.com |

CSS Usage

Cascading Style Sheets (CSS) is a style sheet language used for describing the presentation semantics (the look and formatting) of a document written in a markup language (such as XHTML).

| Technology | Description | Popular sites using this technology |
|---|--|---|
| External  | Styles defined within an external CSS file | www.amazon.co.uk , www.facebook.com , www.linkedin.com |
| CSS Media Query | <i>No description</i> | www.googleadservices.com , www.w3schools.com , www.msn.com |

| | Technology | Description | Popular sites using this technology |
|--------------------------------|--|---------------------------------|--|
| | Embedded  | Styles defined within a webpage | www.amazon.in , www.icloud.com , www.cisco.com |
