Background

Site title	Blogger.com - Create a unique and beautiful blog. It's easy and free.	Date first seen	August 1999
Site rank	252	Primary language	English
Description	Publish your passions your way. Whether you like to share your knowledge, experiences or the latest news, create a unique and beautiful blog for free.		
Keywords	Not Present		
Netcraft Risk Rating	0/10 <div></div> [FAQ]		

Network

Site	https://www.blogger.com	Netblock Owner	Google LLC
Domain	blogger.com	Nameserver	ns1.google.com
IP address	209.85.202.191 (VirusTotal)	DNS admin	dns-admin@google.com
IPv6 address	2a00:1450:400b:c00:0:0:0:bf	Reverse DNS	dg-in-f191.1e100.net
Domain registrar	markmonitor.com	Nameserver organisation	whois.markmonitor.com
Organisation	Google LLC, United States	Hosting company	Google
Top Level Domain	Commercial entities (.com)	DNS Security Extensions	unknown
Hosting country	US		

SSL/TLS

SSLv3/POODLE

This site does not support the SSL version 3 protocol.

[More information about SSL version 3 and the POODLE vulnerability.](#)

Heartbleed

The site offered the Heartbeat TLS extension prior to the Heartbleed disclosure, but is using a new certificate and no longer offers Heartbeat.

This test does not exploit the Heartbleed vulnerability but uses information from conventional HTTPS requests. [More information about Heartbleed detection.](#)

Assurance	Organisation validation		
Organisation	Google LLC	Common name	*.blogger.com
State	California	Country	US

Organisational unit	Not Present		Subject Alternative Name	*.blogger.com, *.blogblog.com, *.daily.alpha.blogger.com, *.gaia.alpha.blogger.com, *.prod.alpha.blogger.com, *.weekly.alpha.blogger.com, blogblog.com, blogger.com, daily.alpha.blogger.com, gaia.alpha.blogger.com, prod.alpha.blogger.com, weekly.alpha.blogger.com	
Validity period	From Jun 18 2019 to Sep 10 2019 (2 months, 3 weeks)		Matches hostname	Yes	
Server	gws		Public key algorithm	rsaEncryption	
Protocol version	TLSv1.2		Public key length	2048	
Certificate check	ok		Signature algorithm	sha256WithRSAEncryption	
Serial number	0x2ec8937bc0c9a509c50919a3e94a81e7		Cipher	ECDHE-RSA-AES128-GCM-SHA256

Sender Policy Framework

A host's Sender Policy Framework (SPF) describes who can send mail on its behalf. This is done by publishing an SPF record containing a series of [rules](#). Each rule consists of a qualifier followed by a specification of which domains to apply this qualifier to. For more information please see [openspf.org](#).

Warning: It appears that this host does not have an SPF record. Setting up an SPF record helps prevent the delivery of forged emails from your domain.

DMARC

DMARC (Domain-based Message Authentication, Reporting and Conformance) is a mechanism for domain owners to indicate how mail purporting to originate from their domain should be authenticated. It builds on SPF and DKIM, providing a method to set policy and to give reporting of failures. For more information please see [dmarc.org](#).

This host does not have a DMARC record.

Web Trackers

Web Trackers are third-party resources loaded onto a webpage. Trackable resources include social sharing widgets, javascript files, and images. These trackers can be used to monitor individual user behaviour across the web. Data derived from these trackers are primarily used for advertising or analytics purposes.

3 known trackers were identified.

Site Technology

Fetchd on 4th July 2019

Server-Side

Includes all the main technologies that Netcraft detects as running on the server such as PHP.

Technology	Description	Popular sites using this technology
SSL	A cryptographic protocol providing communication security over the Internet	kayakoreport.hostasaurus.com

Client-Side

Includes all the main technologies that run on the browser (such as JavaScript and Adobe Flash).

Technology	Description	Popular sites using this technology
JavaScript	Widely-supported programming language commonly used to power client-side dynamic content on websites	vdms-ssl.cedexis-test.com

Content Delivery Network

A content delivery network or content distribution network (CDN) is a large distributed system of servers deployed in multiple data centers in the Internet. The goal of a CDN is to serve content to end-users with high availability and high performance.

Technology	Description	Popular sites using this technology
Google	Google API to retrieve	www.meteofrance.com ,
Hosted	JavaScript libraries	www.mediafire.com ,
Libraries 		www.nc audienceexchange.com

Character Encoding

A character encoding system consists of a code that pairs each character from a given repertoire with something else such as a bit pattern, sequence of natural numbers, octets, or electrical pulses in order to facilitate the transmission of data (generally numbers or text) through telecommunication networks or for data storage.

Technology	Description	Popular sites using this technology
UTF8 	UCS Transformation Format 8 bit	gmail.com

HTTP Compression

HTTP compression is a capability that can be built into web servers and web clients to make better use of available bandwidth, and provide greater transmission speeds between both.

Technology	Description	Popular sites using this technology
Gzip Content Encoding 	Gzip HTTP Compression protocol	www.amazon.fr , www.expedia.com , www.amazon.it

Web Browser Targeting

Web browser targeting enables software applications to make use of specific functions of the browser as well as optimizing the application for specific browser versions.

Technology	Description	Popular sites using this technology
Strict Transport Security 	Web security policy mechanism whereby a web server declares that complying user agents are to interact with it using only secure HTTP connections	www.facebook.com , www.amazon.co.uk , login.salesforce.com
Strict-Transport-Security (including subdomains)	<i>No description</i>	www.coinbase.com , outlook.live.com , docs.microsoft.com
Content Security Policy 	Detect and mitigate attacks in the browser	instagram.com , dtm.advertising.com , lastpass.com
Document Compatibility Mode 	A meta-tag used in Internet Explorer 8 to enable compatibility mode	yandex.ru , outlook.office365.com
X-Content-Type-Options 	Browser MIME type sniffing is disabled	www.googleadservices.com , secure-assets.rubiconproject.com , accounts.google.com
X-Frame-Options Deny 	Prevents the web page being embedded in a frame	www.virustotal.com , www.tumblr.com , mail.protonmail.com
X-XSS-Protection Disabled 	Cross-site scripting protection is disabled	www.w3schools.com , www.google.com , www.researchgate.net
X-Frame-Options Same Origin	Do not allow this site to be rendered within an iframe	paragon-na.amazon.com

Technology	Description	Popular sites using this technology
Content Security Policy Report 	Detect, mitigate and report attacks in the browser	www.icloud.com , mail.google.com
X-XSS-Protection Block 	Block pages on which cross-site scripting is detected	discordapp.com

Privacy Management

Privacy policy is a statement or a legal document (privacy law) that discloses some or all of the ways a party gathers, uses, discloses and manages a customer or client's data.

Technology	Description	Popular sites using this technology
P3P 	Platform for Privacy Preferences Project allows websites to express their privacy practices	static.olark.com , static.addtoany.com , login.aliexpress.com

Doctype

A Document Type Declaration, or DOCTYPE, is an instruction that associates a particular SGML or XML document (for example, a webpage) with a Document Type Definition (DTD).

Technology	Description	Popular sites using this technology
HTML5 	Latest revision of the HTML standard, the main markup language on the web	

HTML 5

HTML5 is a markup language for structuring and presenting content for the World Wide Web and a core technology of the Internet. It is the fifth revision of the HTML standard.

Technology	Description	Popular sites using this technology
Viewport meta tag	HTML5 tag usually used for mobile optimization	

CSS Usage

Cascading Style Sheets (CSS) is a style sheet language used for describing the presentation semantics (the look and formatting) of a document written in a markup language (such as XHTML).

Technology	Description	Popular sites using this technology
External 	Styles defined within an external CSS file	www.bitmex.com , www.msn.com , www.linkedin.com
