SSL Certificate Chain

Hosting History

| Netblock owner | IP address | OS | Web server | Last seen |
|--|----------------|-------|------------|-------------|
| WEBSITEWELCOME.COM 5005 Mitchelldale Suite 100 Houston TX US 77092 | 108.179.252.83 | Linux | Apache | 12-Jul-2019 |

Sender Policy Framework

A host's Sender Policy Framework (SPF) describes who can send mail on its behalf. This is done by publishing an SPF record containing a series of [rules](#). Each rule consists of a qualifier followed by a specification of which domains to apply this qualifier to. For more information please see [openspf.org](#).

| Qualifier | Mechanism | Argument |
|-------------|-----------|-------------------------------|
| + (Pass) | a | |
| + (Pass) | mx | |
| + (Pass) | ip4 | 200.98.224.11 |
| ? (Neutral) | all | |

Modifiers extend the functionality of SPF records. The most common one is the redirect which indicates another host contains the SPF record being searched for.

| Modifier | Argument |
|----------|----------|
|----------|----------|

DMARC

DMARC (Domain-based Message Authentication, Reporting and Conformance) is a mechanism for domain owners to indicate how mail purporting to originate from their domain should be authenticated. It builds on SPF and DKIM, providing a method to set policy and to give reporting of failures. For more information please see dmarc.org.

This host does not have a DMARC record.

Web Trackers

Web Trackers are third-party resources loaded onto a webpage. Trackable resources include social sharing widgets, javascript files, and images. These trackers can be used to monitor individual user behaviour across the web. Data derived from these trackers are primarily used for advertising or analytics purposes.

No known trackers were identified.
