Sender Policy Framework

A host's Sender Policy Framework (SPF) describes who can send mail on its behalf. This is done by publishing an SPF record containing a series of rules. Each rule consists of a qualifier followed by a specification of which domains to apply this qualifier to. For more information please see openspf.org.

Warning: It appears that this host does not have an SPF record. Setting up an SPF record helps prevent the delivery of forged emails from your domain.

DMARC

DMARC (Domain-based Message Authentication, Reporting and Conformance) is a mechanism for domain owners to indicate how mail purporting to originate from their domain should be authenticated. It builds on SPF and DKIM, providing a method to set policy and to give reporting of failures. For more information please see dmarc.org.

This host does not have a DMARC record.

Web Trackers

Web Trackers are third-party resources loaded onto a webpage. Trackable resources include social sharing widgets, javascript files, and images. These trackers can be used to monitor individual user behaviour across the web. Data derived from these trackers are primarily used for advertising or analytics purposes.

No known trackers were identified.

Site Technology

Web Browser Fetched on 12th July 2019 Targeting

Web browser targeting enables software applications to make use of specific functions of the browser as well as optimizing the application for specific browser versions.

Technology	Description	Popular sites using this technology
X-Frame- Options Same Origin	Do not allow this site to be rendered within an iframe	www.w3schools.com, www.google.com, www.bitmex.com
X-Content- Type- Options 🗗	Browser MIME type sniffing is disabled	www.linkedin.com, www.googleadservices.com, www.facebook.com
Strict Transport Security	Web security policy mechanism whereby a web server declares that complying user agents are to interact with it using only secure HTTP connections	www.amazon.co.uk, login.salesforce.com, accounts.google.com
Content Security Policy 🗗	Detect and mitigate attacks in the browser	www.coinbase.com, dtm.advertising.com, lastpass.com
X-XSS- Protection Block 🗗	Block pages on which cross-site scripting is detected	paragon-na.amazon.com, secure- assets.rubiconproject.com, docs.microsoft.com

CSS Usage

Cascading Style Sheets (CSS) is a style sheet language used for describing the presentation semantics (the look and formatting) of a document written in a markup language (such as XHTML).
