Sender Policy Framework

A host's Sender Policy Framework (SPF) describes who can send mail on its behalf. This is done by publishing an SPF record containing a series of rules. Each rule consists of a qualifier followed by a specification of which domains to apply this qualifier to. For more information please see openspf.org.

Qualifier	Mechanism	Argument
+ (Pass)	include	servidorwebfacil.com
~ (SoftFail)	all	

Modifiers extend the functionality of SPF records. The most common one is the redirect which indicates another host contains the SPF record being searched for.

Modifier Argument	
-------------------	--

DMARC

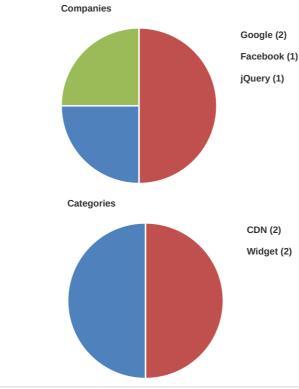

DMARC (Domain-based Message Authentication, Reporting and Conformance) is a mechanism for domain owners to indicate how mail purporting to originate from their domain should be authenticated. It builds on SPF and DKIM, providing a method to set policy and to give reporting of failures. For more information please see dmarc.org.

This host does not have a DMARC record.

Web Trackers

Web Trackers are third-party resources loaded onto a webpage. Trackable resources include social sharing widgets, javascript files, and images. These trackers can be used to monitor individual user behaviour across the web. Data derived from these trackers are primarily used for advertising or analytics purposes.

4 known trackers were identified.

_			
Company •	Primary Category	Tracker	Popular Sites with this Tracker
acebook •	Widget	Facebook	www.mcherderingphotography.com, www.express.co.uk, www.redfin.com
Google 🚱	CDN	Googlecdn	www.upwork.com, www.ccn.com, www.sdna.gr
	Widget	Googlewidget	www.binance.com, www.bitmex.com, www.phimmoi.net

Site Technology

Fetched on 13th July 2019

Server-Side

Includes all the main technologies that Netcraft detects as running on the server such as $\ensuremath{\mathsf{PHP}}.$

Technology	Description	Popular sites using this technology
PHP 🚱	PHP is supported and/or running	www.ccn.com, www.mediafire.com, www.leparisien.fr
SSL 🗗	A cryptographic protocol providing communication security over the Internet	accounts.google.com, kayakoreport.hostasaurus.com, docs.microsoft.com

Client-Side

Includes all the main technologies that run on the browser (such as JavaScript and Adobe Flash).

Technology	Description	Popular sites using this technology
Local Storage	No description	www.primevideo.com, www.espncricinfo.com, www.hbg.com
JavaScript 🚱	Widely-supported programming language commonly used to power client-side dynamic content on websites	www.bitmex.com, vdms- ssl.cedexis-test.com, login.salesforce.com

Client-Side Scripting Frameworks

Frameworks or libraries allow for easier development of applications by providing an Application Program Interface (API) or a methodology to follow whilst developing.

Technology	Description	Popular sites using this technology
jQuery 🚭	A JavaScript library used to simplify the client-side scripting of HTML	www.sdna.gr, www.amazon.in, www.amazon.co.uk
Font Awesome Web	No description	www.balasai.com, www.nicehash.com, www.wilderssecurity.com
Google Language/Translation ☑	Language translation API from Google	www.noip.com, www.standardmedia.co.ke www.aliexpress.com
Google Hosted Libraries 🗗	Google API to retrieve JavaScript libraries	www.bankofamerica.com, www.w3schools.com, www.google.com
Bootstrap Javascript Library	No description	www.capitalone.com, www.ansa.it, www.asus.com

Tools

Any software or site builder that aids web development.

Technology	Description	Popular sites using this technology
Dreamweaver ☑	Adobe's web design and development application	www.astro.com, www.ashampoo.com, www.incrediblecharts.com

Web Gallery

The Web Gallery of Art (WGA) is a virtual art gallery website.

Technology	Description	Popular sites using this technology
JQuery PrettyPhoto 🗗	No description	www.espotoworldtour.com, www.veedi.com, www.jawharafm.net

Character Encoding

A character encoding system consists of a code that pairs each character from a given repertoire with something else such as a bit pattern, sequence of natural numbers, octets, or electrical pulses in order to facilitate the transmission of data (generally numbers or text) through telecommunication networks or for data storage.

Technology	Description	Popular sites using this technology
UTF8 🚱	UCS Transformation Format 8 bit	gmail.com

HTTP Compression

HTTP compression is a capability that can be built into web servers and web clients to make better use of available bandwidth, and provide greater transmission speeds between both.

Technology	Description	Popular sites using this technology
Gzip Content Encoding 🚱	Gzip HTTP Compression protocol	www.tsetmc.com, www.amazon.fr, www.offensive- security.com

Doctype

A Document Type Declaration, or DOCTYPE, is an instruction that associates a particular SGML or XML document (for example, a webpage) with a Document Type Definition (DTD).

Technology	Description	Popular sites using this technology
HTML5 ₺	Latest revision of the HTML standard, the main markup language on the web	www.googleadservices.com, secure- assets.rubiconproject.com, dtm.advertising.com

HTML 5

HTML5 is a markup language for structuring and presenting content for the World Wide Web and a core technology of the Internet. It is the fifth revision of the HTML standard.

Technology	Description	Popular sites using this technology
Viewport meta tag	HTML5 tag usually used for mobile optimization	www.coinbase.com, discordapp.com, outlook.live.com

CSS Usage

Cascading Style Sheets (CSS) is a style sheet language used for describing the presentation semantics (the look and formatting) of a document written in a markup language (such as XHTML).

Technology	Description	Popular sites using this technology
External 🕏	Styles defined within an external CSS file	www.facebook.com , www.msn.com , www.linkedin.com
