OCSP servers	http://ocsp.ir	nt-x3.letsencrypt.org - 100% uptin	ne in the past	24 hours 🏧	
OCSP stapling response	No response received				
Certificate	Signed Certificate Timestamps (SCTs)				
transparency	Source	Log		Timestamp	Signature Verification
	Certificate	Cloudflare Nimbus 2019 dh7agzgtMxCRIZzOJU9CcMK//V5CIAjGl	NzV55hB7zFY=	2019-07-08 13:37:51	Success
	Certificate	Google Argon 2019 Y/Lbzeg7zCzPC3KEJ1drM6SNYXePvXWm0	DLHHaFRL2I0=	2019-07-08 13:37:51	Success

## **SSL Certificate Chain**

## **Sender Policy Framework**

A host's Sender Policy Framework (SPF) describes who can send mail on its behalf. This is done by publishing an SPF record containing a series of rules. Each rule consists of a qualifier followed by a specification of which domains to apply this qualifier to. For more information please see openspf.org.

Qualifier	Mechanism	Argument
+ (Pass)	a	
+ (Pass)	mx	
+ (Pass)	a	server.local
- (Fail)	all	

Modifiers extend the functionality of SPF records. The most common one is the redirect which indicates another host contains the SPF record being searched for.

Modifier	Argument	

#### **DMARC**

DMARC (Domain-based Message Authentication, Reporting and Conformance) is a mechanism for domain owners to indicate how mail purporting to originate from their domain should be authenticated. It builds on SPF and DKIM, providing a method to

set policy and to give reporting of failures. For more information please see dmarc.org.

Raw DMARC record: v=DMARC1; p=none

Tag	Field	Value
p=none	Requested handling policy	None: no specific action to be taken regarding delivery of messages.

## **Web Trackers**

Web Trackers are third-party resources loaded onto a webpage. Trackable resources include social sharing widgets, javascript files, and images. These trackers can be used to monitor individual user behaviour across the web. Data derived from these trackers are primarily used for advertising or analytics purposes.

No known trackers were identified.

## **Site Technology**

Fetched on 15th July 2019

#### Server-Side

Includes all the main technologies that Netcraft detects as running on the server such as PHP.

Technology	Description	Popular sites using this technology
PHP 🚱	PHP is supported and/or running	www.wilderssecurity.com, www.w3schools.com, www.leparisien.fr
SSL 🗗	A cryptographic protocol providing communication security over the Internet	www.google.com, www.coinbase.com, accounts.google.com

#### Client-Side

Includes all the main technologies that run on the browser (such as JavaScript and Adobe Flash).

Technology	Description	Popular sites using this technology
Client Pull	No description	www.sdna.gr,
		www.asus.com,
		www.facebook.com

## **Web Browser Targeting**

Web browser targeting enables software applications to make use of specific functions of the browser as well as optimizing the application for specific browser versions.

Technology	Description	Popular sites using this technology
X-Frame- Options Same Origin	Do not allow this site to be rendered within an iframe	www.linkedin.com, www.bitmex.com, www.amazon.co.uk
X-Content- Type- Options 🚱	Browser MIME type sniffing is disabled	www.googleadservices.com, outlook.live.com, docs.microsoft.com
